

Mean and Good Aliens

Once upon a time Mars was a very dirty. Mean aliens from Neptune had a bunch of trash and they dumped it on Mars. Some nice aliens from Mercury, Venus, and Saturn started cleaning up the trash on Mars. They found an old couch, ladder, TV's and much more.

Echo was flying around mars in his rocket ship with Petunia. Then they suddenly saw all the trash on Mars and the aliens cleaning it all up. Echo and Petunia asked the aliens how all the trash got there. The aliens said they did not know.

Echo and Petunia wanted to help. They cleaned and cleaned and cleaned. All of a sudden the bad aliens from Neptune came to put more trash on Mars.

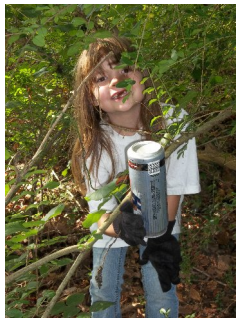

Echo, Petunia, and the good aliens explained to the bad aliens how to reduce, reuse, and recycle. They also showed them how to make new things out of their recycling.

Here are some rules about keeping your planet clean.

1. Don't throw all your trash on Mars. (or any other planet)
2. Always recycle.
3. Reuse everything you can.
4. Always throw away your trash in the trash can.
5. Help out with clean-ups. (just like the aliens from Mercury, Venus, and Saturn)

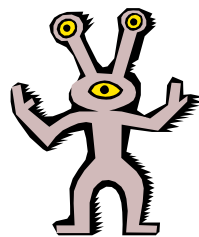

Mercury

Earth

Venus

Saturn
